

Note #1 for the Class of 625.661

Welcome to this course. Please read the bullet points below.

- Most lecture slides/notes closely follow the main course material covered in the textbook and are to serve as an essential guide. For details, please refer to the textbook.
- There are many typographical errors or even numerical errors in the textbook. You are welcome to identify and discuss with me. Despite the errors, this textbook presents the best flow of course material for regression modelling.
- Development of statistical methods (e.g., estimators, statistical tests) is expected, either with or without mathematical/statistical proof, in this course.
- Applications of statistical methods are expected.
- Supplementary material not covered in the textbook will be given in additional lectures/notes from time to time.
- You are welcome to research external sources to help broaden your learning and interest, also welcome to discuss with me.
- There may be opportunities to earn bonus points.
